

Archer Electrical

CASE STUDY/RETAIL/ 018 SEPT 11

CLIENT: DUNE  
 LOCATION: Stratford Westfield  
 DESCRIPTION: Full Electrical Installation  
 DATE: September 2011

Stimulated by the London 2012 Olympic Games Westfield Stratford City is the gateway to London's Olympic Park and is part of one of the largest urban regeneration projects ever undertaken in the UK, providing a new commercial, shopping and entertainment district.

One of our projects undertaken at this new Westfield Centre was for Dune Shoe stores where we carried out the full electrical installation including; retail lighting, power and distribution, data, emergency lighting, and fire detection systems. Our final installation was commissioned, certified and handed over on time for the grand opening prior to the Olympic Games.

*“Client design and lighting changes whilst conducting the installation, coupled with the operations logistics of working within the new Westfield Centre, made this particular project challenging. We worked to the new requirements resulting in the client being delighted with the end result”.*

Neil Meredith  
 Project Manager AAE
