

Archer Electrical

CASE STUDY/OFFICE/ 035 MARCH 11

CLIENT: HAMLEYS
 LOCATION: OFFICES, LONDON
 DESCRIPTION: Full Electrical Installation
 DATE: March 2011

Hamley's flagship London store is the largest toy shop in the world, has seven floors covering 54,000 square feet and is considered one of London's major tourist attractions receiving about five million visitors a year.

Working closely with WDL Interiors Architects and Powell's Shopfitting Group Archer Electrical undertook the Electrical Installation for the refurbishment of Hamley's Head Offices at Fouberts Place close by to their flagship Regent Street Store. The Office refurbishment was completed within March 2011 and includes a new Reception Area.

Our electrical design engineer Simon Rogers helped with the design and specification of the lighting scheme which we installed in addition to us completing the power, voice and data systems to the office workstations together with all the mechanical wiring requirements.

Testimonial:
 What the client said:

"We enjoyed a very good working relationship with Archer Electrical throughout the Hamleys Offices refurbishment project, we found them to be very proactive in working with us to ensure we provide a quality product and service for our client."
