

CLIENT: JOHN BELL & CROYDEN
LOCATION: LONDON W1
DESCRIPTION: Full Electrical Installation
DATE: September 2015

Our undertaking of the entire electrical installation for this £4 million refurbishment helped take central London pharmacy, John Bell & Croyden to a modern and distinctive world-class health and wellbeing destination. With history dating back more than 200 years, the Wigmore Street store first opened in 1912, the refurbishment saw the previous store fittings stripped back and Archers installed new bespoke luminaires sympathetic to the original ornate columns and cornices. We worked with lighting designers and manufacturers to create a bespoke store that will entice customers and retain patients, the well-designed lighting scheme make the customer experience more pleasurable as products are easy to find and view, delivering all of their healthcare needs in an exceptional surrounding. We have worked with Lloyds Pharmacy for 20 years and are proud to be part of creating their new Flagship pride and joy which is John Bell & Croyden, without doubt a world-class pharmacy.

Testimonial:
 What the client said:

"Dear Ross I just wanted to drop you a personal note to say a massive thank you for helping to bring the John Bell & Croyden refit to a successful and triumphant conclusion recently. I know it was a huge obligation and was incredibly difficult at times but your personal commitment and determination to finish on time and to the highest standard shone through. Our American colleagues were hugely complimentary and in awe of the refit, stating it was one of the best stores they'd ever seen, which is a superb endorsement. We truly have created the greatest community pharmacy in the world."

Cormac Tobin - Managing Director - Celesio UK
