

Archer Electrical

CASE STUDY/HEALTHCARE/ 039 FEB 09

CLIENT: LLOYDSPHARMACY
 LOCATION: Selfridges, Oxford St, London
 DESCRIPTION: Full Electrical Installation
 DATE: February 2009

A 250msq bespoke Lloydspharmacy within the Ground Floor of Selfridge’s iconic store in Oxford Street, London. Working together with Approved Contracts we achieved conception to completion within a very tight schedule.

We also worked closely with Selfridges appointed Consulting Building Engineers, Troup Bywater + Anders, in implementing a programme of phased mechanical & electrical replacement infrastructure.

This latest concept in healthcare will offer a wide range of health products and has two full-size doctors’ consultation rooms for use by a local medical practice to enable a wide range of health focused services including medicine reviews and travel vaccinations

Testimonial:
 What the client said:

“AAE were engaged as the nominated electrical contractor on a new store development project within the prestigious Selfridges store in Central London. The electrical element of the project was particularly intricate and as a consequence necessitated tradesmen of the highest calibre to undertake the necessary work. The project from commencement to completion ran faultlessly and was finished by AAE on-time and to budget. The whole team at AAE should be extremely proud of their achievement in this regard and from myself, the Project Manager for the site, I would like to convey my whole hearted thanks for helping to produce a trouble free and impressive project”

Jeff Owen, Senior Projects Manager –
 Lloyds pharmacy Property & Development
