

Archer Electrical

CASE STUDY/LEISURE/ 032 JUNE 12

CLIENT: Lloydspharmacy
 LOCATION: London 2012
 DESCRIPTION: Full Electrical Installation
 DATE: June 2012

We were appointed electrical contractors for three pharmacies to serve London 2012 Olympics. Located within the media centre and adjacent to the baseball courts and the main stadium our installations called for meticulous planning.

Archer electrical and its operatives underwent stringent vetting processes to qualify for accreditation enabling us to conduct works within the Olympic Park. The pharmacies were completed aligned to the 2012 Games' immovable deadline.

We are acutely aware of our customer's commitments to the environment and as such following the games all electrical equipment and materials employed for these three pharmacies were removed and utilised for future projects.

Testimonial:
 What the client said:

"Having worked with Archer Electrical for many years we had no hesitation in awarding them with our pharmacy fit outs for the Olympic Park which was executed to perfection. I am certain that Lloyds pharmacy and Archers will continue to work closely together in the future"

John Heath - Shopfitting Manager
