

Archer Electrical

CASE STUDY/RESIDENTIAL/ 083 SEPT 2019

CLIENT: STUDY INN  
LOCATION: Loughborough  
DESCRIPTION: Full Electrical Installation  
DATE: September 2019

A period of six months on site saw us successfully complete more than 200 student accommodation serviced rooms under the Study Inn brand. The midlands-based company Study Inn has now created more than 1,800 student rooms across the UK.

This £20m investment to regenerate a former Jobcentre building in Loughborough was completed within schedule in order for the students to take residence in time for the start of the University term.

We undertook the entire electrical installation and Study Inn were extremely impressed by the commitment of our team to maintain progress to completion and ensure a smooth handover.

This project showcases our commitment to building lasting business relationships in that we have been rewarded by securing the contract for the next Study Inn project in Nottingham.

Testimonial:  
What the client said:

“We have been extremely impressed by your team in Loughborough, and nothing has been too much trouble for them! We just need to pull out the stops on the roof extension now to get this over the line, before we move onto our next project in Nottingham!”

**Luke Farquharson - Construction Manager**
