

Archer Electrical

CASE STUDY/RESIDENTIAL/ 093 SEPT 2020

CLIENT: STUDY INN
LOCATION: Nottingham
DESCRIPTION: Full Electrical Installation
DATE: September 2020

Following our successful completion of student accommodation projects in Coventry and Loughborough we were delighted to be awarded the next Study Inn project in Nottingham. This former City Centre Experian headquarters building underwent an extensive redesign, remodelling and extension of the building providing a stunning result which allows students to experience the full luxury of student accommodation. This is the largest project we have undertaken for Study Inn providing 288 Student Room's with an electrical contract value of C. £1 Million.

Study Inn's studios offer a fantastic design for student living with latest state-of-art facilities, including wellness spa & gym, big screen cinema, yoga studio, and its very own piano!

A period of twelve months on site saw us successfully complete our third major project for the midlands-based company, completing within schedule in order for the students to take residence in time for the start of the University term.

We are looking forward to the opportunity of moving onto the next project; Leeds in 2021.

Testimonial:
What the client said:

"Thanks Adrian. I'm sure it goes without saying, your guys have done a great job here so far, and we are very happy with their progress, I trust this pace will be maintained with the 2nd fix and commissioning to ensure a smooth handover."

Luke Farquharson
Construction Manager – Study Inn
