

Archer Electrical

CASE STUDY/RETAIL/ 033 FEB 10

CLIENT: TORO ROSSO
 LOCATION: Bicester
 DESCRIPTION: Full Electrical Installation
 DATE: February 2010

Micro lights Group appointed Archer Electrical to work in conjunction with them to upgrade the lighting at Scuderia Toro Rosso's Formula One factory in Bicester Oxfordshire.

The lighting was installed within the wind tunnel and when in operation it withstands winds equivalent to that of a Category 4 Hurricane (Sustained winds 131-155 mph [210-249 km/hr]).

The lighting is designed to assist the engineers in improving the aerodynamics of the car.

Testimonial:
 What the client said:

Wind Tunnel manager Chris Saunders commented that he was very pleased with the end result and the benefit it will have to the team.
