

Archer Electrical

CASE STUDY/RETAIL/ 075 June 2017

CLIENT: VANS
 LOCATION: Wembley Park LDO
 DESCRIPTION: Full Electrical Installation
 DATE: June 2017

We teamed up with Drycon to give this new store in LDO Wembley Park that unique Vans look. The result was a superb urban retail space to hang out, try on, and purchase the latest in skate shoe and skate apparel.

The existing store was stripped back to the bare walls, before the entire unit was rewired, plastered and decorated. Air conditioning units and a contemporary sound system were then installed.

Archers provided a complete electrical retail infrastructure including Power, Fire Alarms, Emergency Lighting, DDA and Data systems, the carefully considered retail lighting scheme consisted of a combination of track lighting, recessed spotlights, lightboxes and display pendants,

With more than 45 years of history, Vans has risen to become a worldwide dominant force in the action sports industry, and the genuine brand of choice for the contemporary lifestyle consumer. LDO Wembley Park boasts 265,000sq ft of retail and leisure space includes 70 outlet stores, restaurants and bars, a Cineworld complex and a large children’s play park.

Testimonial:
 What the client said:

“Archer Electrical continue to be our preferred Electrical Contractor. They are reliable, conscientious and have never let us down.”

Michael Blanchfield
 Managing Director - Drycon Limited
